

Recombinant Human RNF185

Catalog No: #GP11962

Package Size: #GP11962-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human RNF185
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to N terminal 185 amino acids of human ring finger protein 185
Target Name	ring finger protein 185
Accession No.	Swissprot:Q96GF1 Gene Accession:BC009504
Uniprot	Q96GF1
GeneID	91445;
Storage	-20~-80°C, pH 7.6 PBS

Background

RNF185 (ring finger protein 185), also known as FLJ38628, is a 192 amino acid multi-pass membrane protein containing one RING-type zinc finger. Two RNF185 isoforms exist as a result of alternative splicing, and the gene encoding RNF185 maps to human chromosome 22, which houses over 500 genes and is the second smallest human chromosome. Mutations in several of the genes that map to chromosome 22 are involved in the development of Phelan-McDermid syndrome, Neurofibromatosis type 2, autism and schizophrenia.
