

Recombinant Human SNX4

Catalog No: #GP12048

Package Size: #GP12048-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human SNX4
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 200-400 amino acids of human sorting nexin 4
Target Name	sorting nexin 4
Other Names	ATG24B
Accession No.	Swissprot:O95219Gene Accession:BC018762
Uniprot	O95219
GeneID	8723;
Storage	-20~-80°C, pH 7.6 PBS

Background

This gene encodes a member of the sorting nexin family. Members of this family contain a phox (PX) domain, which is a phosphoinositide binding domain, and are involved in intracellular trafficking. This protein associated with the long isoform of the leptin receptor and with receptor tyrosine kinases for platelet-derived growth factor, insulin, and epidermal growth factor in cell cultures, but its function is unknown. This protein may form oligomeric complexes with family members. Two transcript variants, one protein coding and the other non-protein coding, have been found for this gene.
