

# Recombinant Human TTC23

Catalog No: #GP12168

Package Size: #GP12168-1 100ug

Orders: [order@signalwayantibody.com](mailto:order@signalwayantibody.com)Support: [tech@signalwayantibody.com](mailto:tech@signalwayantibody.com)

## Description

Product Name	Recombinant Human TTC23
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to C terminal 200 amino acids of human TTC23
Target Name	tetratricopeptide repeat domain 23
Other Names	HCC-8
Accession No.	Swissprot:Q5W5X9Gene Accession:BC015728
Uniprot	Q5W5X9
GeneID	64927;
Storage	-20~-80°C, pH 7.6 PBS

## Background

The tetratricopeptide repeat (TPR) is a structural motif. It consists in a degenerate 34 amino acid sequence motif identified in a wide variety of proteins. It is found in tandem arrays of 3C16 motifs,[1] which form scaffolds to mediate protein-protein interactions and often the assembly of multiprotein complexes. These repeats usually fold together to produce a single, linear solenoid domain called TPR domain.
