

Recombinant Human UBL3

Catalog No: #GP12185

Package Size: #GP12185-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human UBL3
Brief Description	Recombinant Protein
Immunogen Description	Full length fusion protein
Target Name	ubiquitin-like 3
Other Names	HCG-1; PNSC1
Accession No.	Swissprot:O95164Gene Accession:BC059385
Uniprot	O95164
GeneID	5412;
Storage	-20~-80°C, pH 7.6 PBS

Background

Ubiquitin is a 77 amino acid protein that targets proteins for degradation by the 26S proteasome. Ubiquitin-like proteins are not directly involved in protein degradation, but appear to have many mechanistic similarities with the ubiquitin pathway. UBL3 (ubiquitin-like protein 3), also known as membrane-anchored ubiquitin-fold protein (MUB) or PNSC1, is a 117 amino acid membrane protein belonging to the ubiquitin-like family. Highly conserved between species, UBL3 contains two potential N-glycosylation sites, a potential protein kinase C phosphorylation site, and a potential C-terminal prenylation site. The gene encoding UBL3 is localized to chromosome 13q12.3.
