Recombinant Human TBL1Y

Catalog No: #GP12190

Package Size: #GP12190-1 100ug

Orders: order@signalwayantibody.com Support: tech@signalwayantibody.com

Description

Product Name	Recombinant Human TBL1Y
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to C terminal 200 amino acids of human transducin (beta)-like 1, Y-linked
Target Name	transducin (beta)-like 1, Y-linked
Other Names	TBL1
Accession No.	Swissprot:Q9BQ87Gene Accession:BC130471
Uniprot	Q9BQ87
GeneID	90665;
Storage	-20~-80°C, pH 7.6 PBS

Background

The protein encoded by this gene has sequence similarity with members of the WD40 repeat-containing protein family. The WD40 group is a large family of proteins, which appear to have a regulatory function. It is believed that the WD40 repeats mediate protein-protein interactions and members of the family are involved in signal transduction, RNA processing, gene regulation, vesicular trafficking, cytoskeletal assembly and may play a role in the control of cytotypic differentiation. This gene is highly similar to TBL1X gene in nucleotide sequence and protein sequence, but the TBL1X gene is located on chromosome X and this gene is on chromosome Y. This gene has three alternatively spliced transcript variants encoding the same protein.?
