

Recombinant Human STRAP

Catalog No: #GP12200

Package Size: #GP12200-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human STRAP
Brief Description	Recombinant Protein
Immunogen Description	Full length fusion protein
Target Name	serine/threonine kinase receptor associated protein
Other Names	MAWD; PT-WD; UNRIP
Accession No.	Swissprot:Q9Y3F4Gene Accession:BC000162
Uniprot	Q9Y3F4
GeneID	11171;
Storage	-20~-80°C, pH 7.6 PBS

Background

Serine-threonine kinase receptor-associated protein is an enzyme that in humans is encoded by the STRAP gene. The SMN complex plays a catalyst role in the assembly of small nuclear ribonucleoproteins (snRNPs), the building blocks of the spliceosome. Thereby, plays an important role in the splicing of cellular pre-mRNAs. Most spliceosomal snRNPs contain a common set of Sm proteins SNRPB, SNRPD1, SNRPD2, SNRPD3, SNRPE, SNRPF and SNRPG that assemble in a heptameric protein ring on the Sm site of the small nuclear RNA to form the core snRNP.
