## Description

Product Name	Recombinant Human TIGD5
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 443-642 amino acids of human TIGD5
Target Name	tigger transposable element derived 5
Accession No.	Swissprot:Q53EQ6Gene Accession:BC032632
Uniprot	Q53EQ6
GeneID	84948;
Storage	-20~-80°C, pH 7.6 PBS

## Background

The protein encoded by this gene belongs to the tigger subfamily of the pogo superfamily of DNA-mediated transposons in humans. These proteins are related to DNA transposons found in fungi and nematodes, and more distantly to the Tc1 and mariner transposases. They are also very similar to the major mammalian centromere protein B. The exact function of this gene is not known.
