

Recombinant Human ICK

Catalog No: #GP12309

Package Size: #GP12309-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human ICK
Brief Description	Recombinant Protein
Immunogen Description	Full length fusion protein
Target Name	intestinal cell (MAK-like) kinase
Other Names	ECO; MRK; LCK2
Accession No.	Swissprot:Q9UPZ9Gene Accession:BC035807
Uniprot	Q9UPZ9
GeneID	22858;
Storage	-20~-80°C, pH 7.6 PBS

Background

Eukaryotic protein kinases are enzymes that belong to a very extensive family of proteins which share a conserved catalytic core common with both serine/threonine and tyrosine protein kinases. This gene encodes an intestinal serine/threonine kinase harboring a dual phosphorylation site found in mitogen-activating protein (MAP) kinases. The protein localizes to the intestinal crypt region and is thought to be important in intestinal epithelial cell proliferation and differentiation. Alternative splicing has been observed at this locus and two variants, encoding the same isoform, have been identified.
