

Recombinant Human TYROBP

Catalog No: #GP12312

Package Size: #GP12312-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human TYROBP
Brief Description	Recombinant Protein
Immunogen Description	Full length fusion protein
Target Name	TYRO protein tyrosine kinase binding protein
Other Names	DAP12; KARAP; PLOSL
Accession No.	Swissprot:O43914Gene Accession:BC011175
Uniprot	O43914
GeneID	7305;
Storage	-20~-80°C, pH 7.6 PBS

Background

This gene encodes a transmembrane signaling polypeptide which contains an immunoreceptor tyrosine-based activation motif (ITAM) in its cytoplasmic domain. The encoded protein may associate with the killer-cell inhibitory receptor (KIR) family of membrane glycoproteins and may act as an activating signal transduction element. This protein may bind zeta-chain (TCR) associated protein kinase 70kDa (ZAP-70) and spleen tyrosine kinase (SYK) and play a role in signal transduction, bone modeling, brain myelination, and inflammation. Mutations within this gene have been associated with polycystic lipomembranous osteodysplasia with sclerosing leukoencephalopathy (PLOSL), also known as Nasu-Hakola disease. Its putative receptor, triggering receptor expressed on myeloid cells 2 (TREM2), also causes PLOSL. Multiple alternative transcript variants encoding distinct isoforms have been identified for this gene.?
