

Recombinant Human BCL7A

Catalog No: #GP12343

Package Size: #GP12343-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human BCL7A
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to N terminal 187 amino acids of human BCL7A
Target Name	B-cell CLL/lymphoma 7A
Other Names	BCL7
Accession No.	Swissprot:Q4VC05Gene Accession:BC113627
Uniprot	Q4VC05
GeneID	605;
Storage	-20~-80°C, pH 7.6 PBS

Background

This gene is directly involved, with Myc and IgH, in a three-way gene translocation in a Burkitt lymphoma cell line. As a result of the gene translocation, the N-terminal region of the gene product is disrupted, which is thought to be related to the pathogenesis of a subset of high-grade B cell non-Hodgkin lymphoma. The N-terminal segment involved in the translocation includes the region that shares a strong sequence similarity with those of BCL7B and BCL7C. Two transcript variants encoding different isoforms have been found for this gene.
