

Recombinant Human CD99

Catalog No: #GP12733

Package Size: #GP12733-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human CD99
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 23-185 amino acids of human CD99
Target Name	CD99 molecule
Other Names	MIC2; HBA71; MIC2X; MIC2Y; MSK5X
Accession No.	Swissprot:P14209Gene Accession:BC002584
Uniprot	P14209
GeneID	4267;
Storage	-20~-80°C, pH 7.6 PBS

Background

The protein encoded by this gene is a cell surface glycoprotein involved in leukocyte migration, T-cell adhesion, ganglioside GM1 and transmembrane protein transport, and T-cell death by a caspase-independent pathway. In addition, the encoded protein may have the ability to rearrange the actin cytoskeleton and may also act as an oncosuppressor in osteosarcoma. This gene is found in the pseudoautosomal region of chromosomes X and Y and escapes X-chromosome inactivation. There is a related pseudogene located immediately adjacent to this locus.?
