

Recombinant Human DACT2

Catalog No: #GP12856

Package Size: #GP12856-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human DACT2
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 575-774 amino acids of human DACT2
Target Name	dishevelled binding antagonist of beta catenin 2
Other Names	DPR2; DAPPER2; C6orf116; bA503C24.7
Accession No.	Swissprot:Q5SW24Gene Accession:BC111790
Uniprot	Q5SW24
GeneID	168002;
Storage	-20~-80°C, pH 7.6 PBS

Background

Involved in regulation of intracellular signaling pathways during development. Negatively regulates the Nodal signaling pathway, possibly by promoting the lysosomal degradation of Nodal receptors, such as TGFBR1. May be involved in control of the morphogenetic behavior of kidney ureteric bud cells by keeping cells epithelial and restraining their mesenchymal character. May play an inhibitory role in the re-epithelialization of skin wounds by attenuating TGF-beta signaling (By similarity).
