

Recombinant Human KAT14

Catalog No: #GP13034

Package Size: #GP13034-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human KAT14
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 583-782 amino acids of human KAT14
Target Name	lysine acetyltransferase 14
Other Names	ATAC2; CRP2BP; CSRP2BP; PRO1194; dJ717M23.1
Accession No.	Swissprot:Q9H8E8Gene Accession:BC009174
Uniprot	Q9H8E8
GeneID	57325;
Storage	-20~-80°C, pH 7.6 PBS

Background

CSRP2 is a protein containing two LIM domains, which are double zinc finger motifs found in proteins of diverse function. CSRP2 and some related proteins are thought to act as protein adapters, bridging two or more proteins to form a larger protein complex. The protein encoded by this gene binds to one of the LIM domains of CSRP2 and contains an acetyltransferase domain. Although the encoded protein has been detected in the cytoplasm, it is predominantly a nuclear protein. Alternatively spliced transcript variants have been described.
