

Recombinant Human SNRNP25

Catalog No: #GP13076

Package Size: #GP13076-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human SNRNP25
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 1-132 amino acids of human SNRNP25
Target Name	small nuclear ribonucleoprotein U11/U12 subunit 25
Other Names	C16orf33
Accession No.	Swissprot:Q9BV90Gene Accession:BC001381
Uniprot	Q9BV90
GeneID	79622;
Storage	-20~-80°C, pH 7.6 PBS

Background

Two types of spliceosomes catalyze splicing of pre-mRNAs. The major U2-type spliceosome is found in all eukaryotes and removes U2-type introns, which represent more than 99% of pre-mRNA introns. The minor U12-type spliceosome is found in some eukaryotes and removes U12-type introns, which are rare and have distinct splice consensus signals. The U12-type spliceosome consists of several small nuclear RNAs and associated proteins. This gene encodes a 25K protein that is a component of the U12-type spliceosome.
