

Recombinant Human RPS11

Catalog No: #GP13091

Package Size: #GP13091-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human RPS11
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 2-158 amino acids of human RPS11
Target Name	ribosomal protein S11
Other Names	S11
Accession No.	Swissprot:P62280Gene Accession:BC007283
Uniprot	P62280
GeneID	6205;
Storage	-20~-80°C, pH 7.6 PBS

Background

Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a member of the S17P family of ribosomal proteins that is a component of the 40S subunit. This gene is co-transcribed with the small nucleolar RNA gene U35B, which is located in the third intron. As is typical for genes encoding ribosomal proteins, there are multiple processed pseudogenes of this gene dispersed throughout the genome.
