Recombinant Human STK32C

Catalog No: #GP13143

Package Size: #GP13143-1 100ug

Orders: order@signalwayantibody.com Support: tech@signalwayantibody.com

Description

Recombinant Human STK32C
Recombinant Protein
Fusion protein corresponding to a region derived from 287-486 amino acids of human STK32C
serine/threonine kinase 32C
PKE; YANK3
Swissprot:Q86XU6Gene Accession:BC015792
Q86XU6
-20~-80°C, pH 7.6 PBS

Background

The protein encoded by this gene is a member of the serine/threonine protein kinase family. It is thought that this family member is functional in brain due to its high expression levels there. DNA methylation differences have been found in this gene in monozygotic twins that are discordant for adolescent depression. Alternative splicing results in multiple transcript variants.
