

Recombinant Human GPSM1

Catalog No: #GP13157

Package Size: #GP13157-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

| | |
|-----------------------|---|
| Product Name | Recombinant Human GPSM1 |
| Brief Description | Recombinant Protein |
| Immunogen Description | Fusion protein corresponding to a region derived from 24-223 amino acids of human GPSM1 |
| Target Name | G protein signaling modulator 1 |
| Other Names | AGS3 |
| Accession No. | Swissprot:Q86YR5Gene Accession:BC009979 |
| Uniprot | Q86YR5 |
| GeneID | 26086; |
| Storage | -20~-80°C, pH 7.6 PBS |

Background

G-protein signaling modulators (GPSMs) play diverse functional roles through their interaction with G-protein subunits. This gene encodes a receptor-independent activator of G protein signaling, which is one of several factors that influence the basal activity of G-protein signaling systems. The protein contains seven tetratricopeptide repeats in its N-terminal half and four G-protein regulatory (GPR) motifs in its C-terminal half. Multiple alternatively spliced transcript variants encoding different isoforms have been found for this gene.
