

Recombinant Human SETDB1

Catalog No: #GP13373

Package Size: #GP13373-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human SETDB1
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 1-200 amino acids of human SETDB1
Target Name	SET domain bifurcated 1
Other Names	ESET; KG1T; KMT1E; TDRD21; H3-K9-HMTase4
Accession No.	Swissprot:Q15047Gene Accession:BC009362
Uniprot	Q15047
GeneID	9869;
Storage	-20~-80°C, pH 7.6 PBS

Background

This gene encodes a histone methyltransferase which regulates histone methylation, gene silencing, and transcriptional repression. This gene has been identified as a target for treatment in Huntington Disease, given that gene silencing and transcription dysfunction likely play a role in the disease pathogenesis. Alternatively spliced transcript variants of this gene have been described.
