

Recombinant Human NVL

Catalog No: #GP13445

Package Size: #GP13445-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human NVL
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 657-856 amino acids of human NVL
Target Name	nuclear VCP-like
Other Names	NVL2
Accession No.	Swissprot:O15381Gene Accession:BC012105
Uniprot	O15381
GeneID	4931;
Storage	-20~-80°C, pH 7.6 PBS

Background

This gene encodes a member of the AAA (ATPases associated with diverse cellular activities) superfamily. Multiple transcript variants encoding different isoforms have been found for this gene. Two encoded proteins, described as major and minor isoforms, have been localized to distinct regions of the nucleus. The largest encoded protein (major isoform) has been localized to the nucleolus and shown to participate in ribosome biosynthesis (PMID: 15469983, 16782053), while the minor isoform has been localized to the nucleoplasm.
