

Recombinant Human SNIP1

Catalog No: #GP13640

Package Size: #GP13640-1 100ug

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Recombinant Human SNIP1
Brief Description	Recombinant Protein
Immunogen Description	Fusion protein corresponding to a region derived from 197-396 amino acids of human SNIP1
Target Name	Smad nuclear interacting protein 1
Other Names	PML1; PMRED
Accession No.	Swissprot:Q8TAD8Gene Accession:BC027040
Uniprot	Q8TAD8
GeneID	79753;
Storage	-20~-80°C, pH 7.6 PBS

Background

This gene encodes a protein that contains a coiled-coil motif and C-terminal forkhead-associated (FHA) domain. The encoded protein functions as a transcriptional coactivator that increases c-Myc activity and inhibits transforming growth factor beta (TGF-beta) and nuclear factor kappa-B (NF-kB) signaling. The encoded protein also regulates the stability of cyclin D1 mRNA, and may play a role in cell proliferation and cancer progression. Mutations in this gene are a cause of psychomotor retardation, epilepsy, and craniofacial dysmorphism (PMRED).
