

14-3-3z(Phospho-Ser58) Antibody

Catalog No: #11181

Package Size: #11181-1 50ul #11181-2 100ul

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	14-3-3z(Phospho-Ser58) Antibody
Host Species	Rabbit
Clonality	Polyclonal
Purification	Antibodies were produced by immunizing rabbits with synthetic phosphopeptide and KLH conjugates. Antibodies were purified by affinity-chromatography using epitope-specific phosphopeptide. Non-phospho specific antibodies were removed by chromatography using non-phosphopeptide.
Applications	WB IHC IF
Species Reactivity	Hu Ms Rt
Specificity	The antibody detects endogenous level of 14-3-3 z only when phosphorylated at serine 58.
Immunogen Type	Peptide-KLH
Immunogen Description	Peptide sequence around phosphorylation site of serine 58 (R-S-S(p)-W-R) derived from Human 14-3-3 zeta.
Target Name	14-3-3z
Modification	Phospho
Other Names	1433Z; 143Z; FAS; Factor activating exoenzyme S; KCIP-1
Accession No.	Swiss-Prot: P63104NCBI Protein: NP_001129171.1
Uniprot	P63104
GeneID	7534;
Concentration	1.0mg/ml
Formulation	Supplied at 1.0mg/mL in phosphate buffered saline (without Mg ²⁺ and Ca ²⁺), pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol.
Storage	Store at -20°C for long term preservation (recommended). Store at 4°C for short term use.

Application Details

Predicted MW: 28kd

Western blotting: 1:500~1:1000

Immunohistochemistry: 1:50~1:100

Immunofluorescence: 1:100~1:200

Images

Western blot analysis of extracts from HeLa cells untreated or treated with UV using 14-3-3z(Phospho-Ser58) Antibody #11181.

Immunohistochemical analysis of paraffin-embedded human breast carcinoma tissue using 14-3-3z(Phospho-Ser58) Antibody #11181(left) or the same antibody preincubated with blocking peptide(right).

Immunofluorescence staining of methanol-fixed HeLa cells using 14-3-3z(Phospho-Ser58) Antibody #11181.

Background

This gene product belongs to the 14-3-3 family of proteins which mediate signal transduction by binding to phosphoserine-containing proteins. This highly conserved protein family is found in both plants and mammals, and this protein is 99% identical to the mouse, rat and sheep orthologs. The encoded protein interacts with IRS1 protein, suggesting a role in regulating insulin sensitivity. Several transcript variants that differ in the 5' UTR but that encode the same protein have been identified for this gene.
