

Caspase-10 Antibody

Catalog No: #24016

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Caspase-10 Antibody
Host Species	Rabbit
Clonality	Polyclonal
Purification	DEAE purified
Applications	ELISA WB
Species Reactivity	Hu
Specificity	Antibody only recognizes FLICE2 form of caspase-10.
Immunogen Type	Peptide
Immunogen Description	Raised against a peptide corresponding to amino acids 505 to 521 of human FLICE2.
Target Name	Caspase-10
Other Names	Casp-10, FLICE2
Accession No.	Swiss-Prot:Q92851 Gene ID:843
Uniprot	Q92851
GeneID	843;
Concentration	1mg/ml
Formulation	Supplied in PBS containing 0.02% sodium azide.
Storage	Can be stored at -20°C, stable for one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

Images

Western blot analysis of caspase-10 in HeLa (H), Jurkat (J), A431 (A), K562 (K) whole cell lysates with Caspase-10 antibody at 1 ug/mL.

Immunofluorescence of Caspase-10 in HeLa cells with Caspase-10 antibody at 5 $\mu\text{g/ml}$.

Background

Apoptosis is related to many diseases and induced by a family of cell death receptors and their ligands. Cell death signals are transduced by death domain (DD)-containing adapter molecules and members of the ICE/CED-3 protease family. A novel ICE/CED-3 protease was identified recently, designated FLICE2 and Mch4 and renamed as caspase-10. Caspase-10 has two death effector domains (DEDs) that bind to the DED in the adapter molecule FADD and recruits both TNFR1 and CD95 to form complexes with these receptors. Caspase-10 is therefore involved in the CD95 and TNFR1 induced apoptosis. Caspase-10 cleaves and activates caspase-3, -4, -6, -7, -8 and -9, which causes the proteolytic cleavage of many key proteins such as PARP. Cleavage of PARP occurs in many different systems during apoptosis and is the hallmark of programmed cell death. Caspase-10 is expressed in many tissues and cell lines.
