## **Product Datasheet**

## Goat Anti-Rabbit IgG (H&L) - AF532

Catalog No: #L35236

Package Size: #L35236-1 100 ul #L35236-2 500 ul #L35236-3 1 ml

Orders: order@signalwayantibody.com Support: tech@signalwayantibody.com

| Description           |                                                                                                            |
|-----------------------|------------------------------------------------------------------------------------------------------------|
| Product Name          | Goat Anti-Rabbit IgG (H&L) - AF532                                                                         |
| Brief Description     | Conjugated Secondary Antibody                                                                              |
| Host Species          | Goat                                                                                                       |
| Clonality             | Polyclonal                                                                                                 |
| Purification          | The antibody was isolated from antisera by immunoaffinity chromatography using antigens coupled to agarose |
|                       | beads.                                                                                                     |
| Applications          | E, IH, IF, FC                                                                                              |
| Species Reactivity    | Rb                                                                                                         |
| Specificity           | By immunoelectrophoresis and ELISA this antibody reacts specifically with Rabbit IgG. No antibody was      |
|                       | detected against non immunoglobulin serum proteins.                                                        |
| Immunogen Description | Rabbit IgG                                                                                                 |
| Conjugates            | AF532                                                                                                      |
| Formulation           | 1 mg/ml, liquid in 0.01M Phosphate Buffered Saline, pH 7.2, containing 1% BSA, 50% glycerol, 0.02% Sodium  |

## **Application Details**

IH (1/100 - 1/1000), IF (1/100 - 1/1000), FC (1/1000 - 1/4000), E (Use at an assay dependent concentration)

Azide

Note: This product is for in vitro research use only
