MCM3 (phospho-Ser112) rabbit pAb

-20°C/1

Catalog No: #13726

Package Size: #13726-1 50ul #13726-2 100ul

Orders: order@signalwayantibody.com Support: tech@signalwayantibody.com

| Description | |
|-----------------------|---|
| Product Name | MCM3 (phospho-Ser112) rabbit pAb |
| Host Species | Rabbit |
| Purification | The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen. |
| Applications | WB |
| Species Reactivity | Human |
| Specificity | This antibody detects endogenous levels of Human MCM3 (phospho-Ser112) |
| Immunogen Description | Synthesized phosho peptide around human MCM3 (Ser112) |
| Other Names | DNA replication licensing factor MCM3 (EC 3.6.4.12) (DNA polymerase alpha holoenzyme-associated protein |
| | P1) (P1-MCM3) (RLF subunit beta) (p102) |
| Accession No. | Swiss Prot:P25205GeneID:4172 |
| Uniprot | P25205 |
| GeneID | 4172 |
| SDS-PAGE MW | 89 |
| Concentration | 1 mg/ml |

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Application Details

WB 1:1000-2000

Formulation

Storage

Background

minichromosome maintenance complex component 3(MCM3) Homo sapiens The protein encoded by this gene is one of the highly conserved mini-chromosome maintenance proteins (MCM) that are involved in the initiation of eukaryotic genome replication. The hexameric protein complex formed by MCM proteins is a key component of the pre-replication complex (pre_RC) and may be involved in the formation of replication forks and in the recruitment of other DNA replication related proteins. This protein is a subunit of the protein complex that consists of MCM2-7. It has been shown to interact directly with MCM5/CDC46. This protein also interacts with and is acetylated by MCM3AP, a chromatin-associated acetyltransferase. The acetylation of this protein inhibits the initiation of DNA replication and cell cycle progression. Two transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Jul 2012],
