Dab1 (phospho-Tyr220) rabbit pAb

Catalog No: #13929

Package Size: #13929-1 50ul #13929-2 100ul

Orders: order@signalwayantibody.com Support: tech@signalwayantibody.com

Description

| Product Name | Dab1 (phospho-Tyr220) rabbit pAb |
|-----------------------|---|
| Host Species | Rabbit |
| Purification | The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen. |
| Applications | WB |
| Species Reactivity | Human |
| Specificity | This antibody detects endogenous levels of Human Dab1 (phospho-Tyr220) |
| Immunogen Description | Synthesized phosho peptide around human Dab1 (Tyr220) |
| Other Names | Disabled homolog 1 |
| Accession No. | Swiss Prot:O75553GeneID:1600 |
| Uniprot | O75553 |
| GenelD | 1600 |
| SDS-PAGE MW | 60 |
| Concentration | 1 mg/ml |
| Formulation | Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. |
| Storage | -20°C/1 |
| | |

Application Details

WB 1:1000-2000

Background

DAB1, reelin adaptor protein(DAB1) Homo sapiens The laminar organization of multiple neuronal types in the cerebral cortex is required for normal cognitive function. In mice, the disabled-1 gene plays a central role in brain development, directing the migration of cortical neurons past previously formed neurons to reach their proper layer. This gene is similar to disabled-1, and the protein encoded by this gene is thought to be a signal transducer that interacts with protein kinase pathways to regulate neuronal positioning in the developing brain. Alternatively spliced transcript variants of this gene have been reported, but their full length nature has not been determined. [provided by RefSeq, Jul 2008],
