

SYT3 Antibody FITC Conjugated

Catalog No: #C03785F

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	SYT3 Antibody FITC Conjugated
Host Species	Rabbit
Clonality	Polyclonal
Isotype	IgG
Purification	Purified by Protein A.
Applications	IF
Species Reactivity	Hu Ms Rt
Immunogen Description	KLH conjugated synthetic peptide derived from human synaptotagmin-3
Conjugates	FITC
Target Name	SYT3
Other Names	Synaptotagmin 3; Synaptotagmin-3; SYT 3; SYT-3; Synaptotagmin3; synaptotagmin III; SIII; DKFZp761O132; SytIII; AI385753; P65; SVP65; SYT3_HUMAN.
Accession No.	NCBI Gene ID84258
Uniprot	Q9BQG1
GeneID	84258;
Excitation Emission	494nm 518nm
Concentration	1mg ml
Formulation	0.01M TBS(pH7.4) with 1% BSA, 0.03% Proclin300 and 50% Glycerol.
Storage	Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles.

Application Details

IF=1:50-200

Background

The synaptotagmins are integral membrane proteins of synaptic vesicles thought to serve as Ca(2+) sensors in the process of vesicular trafficking and exocytosis. Calcium binding to synaptotagmin participates in triggering neurotransmitter release at the synapse. The first C2 domain mediates Ca(2+)-dependent phospholipid binding. The second C2 domain mediates interaction with Stonin 2. Synaptotagmin may have a regulatory role in the membrane interactions during trafficking of synaptic vesicles at the active zone of the synapse. It binds acidic phospholipids with a specificity that requires the presence of both an acidic head group and a diacyl backbone. A Ca(2+)-dependent interaction between synaptotagmin and putative receptors for activated protein kinase C has also been reported. It can bind to at least three additional proteins in a Ca(2+)-independent manner; these are neurexins, syntaxin and AP2.

Note: This product is for in vitro research use only
