## CD75 Antibody FITC Conjugated

Catalog No: #C04927F

Description

Orders: order@signalwayantibody.com Support: tech@signalwayantibody.com

| Description           |  |
|-----------------------|--|
| Product Name          | CD75 Antibody FITC Conjugated  |
| Host Species          | Rabbit   |
| Clonality             | Polyclonal   |
| Isotype               | IgG  |
| Purification          | Purified by Protein A.   |
| Applications          | IF   |
| Species Reactivity    | Hu Ms Rt   |
| Immunogen Description | KLH conjugated synthetic peptide aa 325-375 406 derived from human CD75                                    |
| Conjugates            | FITC   |
| Target Name           | CD75   |
| Other Names           | ST6N; SIAT1; ST6Gall; Beta-galactoside alpha-2,6-sialyltransferase 1; Alpha 2,6-ST 1; B-cell antigen CD75; |
|                       | CMP-N-acetylneuraminate-beta-galactosamide-alpha-2,6-sialyltransferase 1; ST6Gal I; Sialyltransferase 1;   |
|                       | ST6GAL1  |
| Accession No.         | Swiss-Prot#P15907NCBI Gene ID6480  |
| Uniprot               | P15907   |
| GenelD                | 6480;  |
| Excitation Emission   | 494nm 518nm  |
| Cell Localization     | Lumenal  |
| Concentration         | 1mg ml   |
| Formulation           | 0.01M TBS(pH7.4) with 1% BSA, 0.03% Proclin300 and 50% Glycerol.   |
| Storage               | Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles.                            |
|                       |  |

## **Application Details**

IF=1:50-200

## Background

The protein encoded by this gene is a type II membrane protein that catalyzes the transfer of sialic acid from CMP sialic acid to galactose-containing substrates. The encoded protein, which is normally found in the Golgi apparatus but which can be proteolytically processed to a soluble form, is involved in the generation of the cell surface carbohydrate determinants and differentiation antigens HB6, CDw75, and CD76. This protein is a member of glycosyltransferase family 29. Three transcript variants encoding two different isoforms have been found for this gene.

Note: This product is for in vitro research use only
