HNF4a(Phospho-Ser304) Antibody

Catalog No: #11043

Package Size: #11043-1 50ul #11043-2 100ul

Support: tech@signalwayantibody.com

Description HNF4a(Phospho-Ser304) Antibody **Product Name Host Species** Rabbit Clonality Polyclonal Purification Antibodies were produced by immunizing rabbits with synthetic phosphopeptide and KLH conjugates. Antibodies were purified by affinity-chromatography using epitope-specific phosphopeptide. Non-phospho specific antibodies were removed by chromatogramphy using non-phosphopeptide. WB Applications Species Reactivity Hu Ms Rt Specificity The antibody detects endogenous level of HNF4a only when phosphorylated at serine 304. Peptide-KLH Immunogen Type Peptide sequence around phosphorylation site of serine 304 (L-R-S(p)-Q-V)derived from Human HNF4a. Immunogen Description Conjugates Unconjugated Target Name HNF4a Modification Phospho Other Names HNF4; TCF; MODY; HNF4A; Accession No. Swiss-Prot: P41235NCBI Protein: NP_000448.3 Concentration 1.0mg/ml Supplied at 1.0mg/mL in phosphate buffered saline (without Mg2+ and Ca2+), pH 7.4, 150mM NaCl, 0.02% Formulation sodium azide and 50% glycerol.

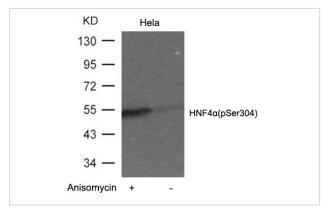

Store at -20°C for long term preservation (recommended). Store at 4°C for short term use.

Application Details

Predicted MW: 52kd
Western blotting: 1:1000

Storage

Western blot analysis of extracts from Hela cells untreated or treated with Anisomyclin using HNF4a(Phospho-Ser304) Antibody #11043.

Background

The protein encoded by this gene is a nuclear transcription factor which binds DNA as a homodimer. The encoded protein controls the expression of several genes, including hepatocyte nuclear factor 1 a, a transcription factor which regulates the expression of several hepatic genes. This gene may play a role in development of the liver, kidney, and intestines. Mutations in this gene have been associated with monogenic autosomal dominant non-insulin-dependent diabetes mellitus type I. Alternative splicing of this gene results in multiple transcript variants.
