## **Product Datasheet**

## ERα (phospho Tyr537) Polyclonal Antibody

Catalog No: #13879

Package Size: #13879-1 50ul #13879-2 100ul

Support: tech@signalwayantibody.com

Description ERα (phospho Tyr537) Polyclonal Antibody **Product Name Host Species** Rabbit Clonality Polyclonal Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. WB;IHC;IF;ELISA Applications Species Reactivity Human, Mouse, Rat Specificity Phospho-ERα (Y537) Polyclonal Antibody detects endogenous levels of ERα protein only when phosphorylated at Y537. The antiserum was produced against synthesized peptide derived from human Estrogen Receptor-alpha Immunogen Description around the phosphorylation site of Tyr537. AA range:501-550 Conjugates Unconjugated Other Names ESR1; ESR; NR3A1; Estrogen receptor; ER; ER-alpha; Estradiol receptor; Nuclear receptor subfamily 3 group A member 1 Accession No. Swiss Prot:P03372GeneID:2099 SDS-PAGE MW 66 Concentration 1 mg/ml

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

## **Application Details**

WB 1:500-1:2000; IHC 1:100-1:300; ELISA 1:10000; IF 1:50-200

-20°C/1

## Background

Formulation

Storage

estrogen receptor 1(ESR1) Homo sapiens This gene encodes an estrogen receptor, a ligand-activated transcription factor composed of several domains important for hormone binding, DNA binding, and activation of transcription. The protein localizes to the nucleus where it may form a homodimer or a heterodimer with estrogen receptor 2. Estrogen and its receptors are essential for sexual development and reproductive function, but also play a role in other tissues such as bone. Estrogen receptors are also involved in pathological processes including breast cancer, endometrial cancer, and osteoporosis. Alternative promoter usage and alternative splicing result in dozens of transcript variants, but the full-length nature of many of these variants has not been determined. [provided by RefSeq, Mar 2014],
