

FKHR(Ab-256) Antibody

Catalog No: #21138

Package Size: #21138-1 50ul #21138-2 100ul

Description

Product Name	FKHR(Ab-256) Antibody
Host Species	Rabbit
Clonality	Polyclonal
Purification	Antibodies were produced by immunizing rabbits with synthetic peptide and KLH conjugates. Antibodies were purified by affinity-chromatography using epitope-specific peptide.
Applications	WB IHC IF
Species Reactivity	Hu Ms Rt
Specificity	The antibody detects endogenous level of total FKHR protein.
Immunogen Type	Peptide-KLH
Immunogen Description	Peptide sequence around aa.254~258 (A-A-S-M-D) derived from Human FKHR/FOXO1A.
Conjugates	Unconjugated
Target Name	FKHR
Other Names	FOXO1
Accession No.	Swiss-Prot: Q12778NCBI Protein: NP_002006.2
Concentration	1.0mg/ml
Formulation	Supplied at 1.0mg/mL in phosphate buffered saline (without Mg ²⁺ and Ca ²⁺), pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol.
Storage	Store at -20°C for long term preservation (recommended). Store at 4°C for short term use.

Application Details

Predicted MW: 78-82 kd

Western blotting: 1:500~1:1000

Immunohistochemistry: 1:50~1:100

Immunofluorescence: 1:100~1:200

Images

Western blot analysis of extracts from HeLa cells using FKHR(Ab-256) Antibody #21138.

Immunohistochemical analysis of paraffin-embedded human breast carcinoma tissue using FKHR(Ab-256) Antibody #21138(left) or the same antibody preincubated with blocking peptide(right).

Immunofluorescence staining of methanol-fixed HeLa cells using FKHR(Ab-256) Antibody #21138.

Background

FKHR belongs to the forkhead family of transcription factors, which are characterized by a distinct forkhead domain. It may play a role in myogenic growth and differentiation. The mammalian DAF-16-like transcription factors, FKHR, FKHL1, and AFX, function as key regulators of insulin signaling, cell cycle progression, and apoptosis downstream of phosphoinositide 3-kinase. Gene activation through binding to insulin response sequences has been essential for mediating these functions. D-type Cyclins (in Class III) is required for FKHR mediated inhibition of cell cycle progression and transformation. FKHR gene is mapped to chromosome 13q14
