

alpha Tubulin antibody

Catalog No: #22038

Package Size: #22038 100ul

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	alpha Tubulin antibody
Host Species	Rabbit
Clonality	Polyclonal
Purification	Purified by antigen-affinity chromatography.
Applications	WB IHC IF
Species Reactivity	Hu
Immunogen Type	Recombinant protein
Immunogen Description	Recombinant protein fragment contain a sequence corresponding to a region within amino acids 227 and 450 of alpha Tubulin
Conjugates	Unconjugated
Target Name	alpha Tubulin
Accession No.	Swiss-Prot:Q71U36Gene ID:7846
Concentration	0.2mg/ml
Formulation	Supplied in 0.1M Tris-buffered saline with 20% Glycerol (pH7.0). 0.01% Thimerosal was added as a preservative.
Storage	Store at -20°C for long term preservation (recommended). Store at 4°C for short term use.

Application Details

Predicted MW: 50kd

Western blotting: 1:500-1:3000

Immunohistochemistry: 1:100-1:250

Immunofluorescence: 1:100-1:200

Images

Sample (30 ug of whole cell lysate)

A: 293T

B: A431

C: JurKat

D: Raji

10% SDS PAGE

Primary antibody diluted at 1: 1000

Immunohistochemical analysis of paraffin-embedded Breast ca, using alpha Tubulin 1A antibody at 1: 250 dilution.

Immunofluorescence analysis of paraformaldehyde-fixed HeLa, using alpha Tubulin 1A antibody at 1: 200 dilution.

Background

Microtubules of the eukaryotic cytoskeleton perform essential and diverse functions and are composed of a heterodimer of alpha and beta tubulins. The genes encoding these microtubule constituents belong to the tubulin superfamily, which is composed of six distinct families. Genes from the alpha, beta and gamma tubulin families are found in all eukaryotes. The alpha and beta tubulins represent the major components of microtubules, while gamma tubulin plays a critical role in the nucleation of microtubule assembly. There are multiple alpha and beta tubulin genes, which are highly conserved among species. This gene encodes alpha tubulin and is highly similar to mouse and rat Tuba1 gene. Northern blotting studies have shown that the gene expression is predominantly found in morphologically differentiated neurologic cells. This gene is one of three alpha-tubulin genes in a cluster on chromosome 12q. [provided by RefSeq]
