Images

Western blot analysis of WDR61 expression in HeLa (A), mouse brain (B), mouse kidney (C), rat pancreas (D) whole cell lysates.

Immunohistochemical analysis of WDR61 staining in human placenta formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.
