ATF1 Rabbit mAb

Catalog No: #49239

Package Size: #49239-1 50ul #49239-2 100ul

Orders: order@signalwayantibody.com Support: tech@signalwayantibody.com

Description

FUS fusion gene antibody ATF1_HUMAN antibody cAMP dependent transcription factor 1 antibody cAMP-dependent transcription factor ATF-1 antibody Cyclic AMP dependent transcription factor ATF 1 antibody Cyclic AMP dependent transcription factor ATF1 antibody Cyclic AMP-dependent transcription factor ATF-1 antibody EWS AFT1 antibody FUS ATF 1 antibody FUS/ATF 1 antibody Protein TREB36 antibody binding protein activating transcription factor 1 fusion protein antibody TREB 36 antibody TREB36 protein antibody Accession No. Swiss-Prot#:P18846	Product Name	ATF1 Rabbit mAb
Clone No. Purification ProA affinity purified Applications WB, ICC/IF, IHC, FC Species Reactivity Hu Immunogen Description Conjugates Unconjugated Other Names Activating transcription factor 1 antibody ATF 1 antibody atf1 antibody ATF1 EWS fusion gene antibody ATF 1 FUS fusion gene antibody ATF1_HUMAN antibody cAMP dependent transcription factor 1 antibody cAMP-dependent transcription factor ATF 1 antibody Cyclic AMP dependent transcription factor ATF1 antibody FUS/ATF 1 antibody Protein TREB36 antibody binding protein activating transcription factor 1 fusion protein antibody TREB 36 antibody TREB36 protein antibody Accession No. Swiss-Prot#:P18846	Host Species	Recombinant Rabbit

binding protein activating transcription factor 1 fusion protein antibody TREB 36 antibody TREB36 antibody TREB36 protein antibody Accession No. Swiss-Prot#:P18846		antibody Cyclic AMP dependent transcription factor ATF1 antibody Cyclic AMP-dependent transcription factor
TREB36 protein antibody Accession No. Swiss-Prot#:P18846		ATF-1 antibody EWS AFT1 antibody FUS ATF 1 antibody FUS/ATF 1 antibody Protein TREB36 antibody RNA
Accession No. Swiss-Prot#:P18846		binding protein activating transcription factor 1 fusion protein antibody TREB 36 antibody TREB36 antibody
		TREB36 protein antibody
Coloulated MW 20 kDa	Accession No.	Swiss-Prot#:P18846
Calculated IVIVV 29 KDa	Calculated MW	29 kDa
Formulation 1*TBS (pH7.4), 1%BSA, 40%Glycerol. Preservative: 0.05% Sodium Azide.	Formulation	1*TBS (pH7.4), 1%BSA, 40%Glycerol. Preservative: 0.05% Sodium Azide.
Storage Store at -20°C	Storage	Store at -20°C

Application Details

Images

Immunohistochemical analysis of paraffin-embedded human lung cancer tissue using anti-ATF1 antibody. Counter stained with hematoxylin.

Immunohistochemical analysis of paraffin-embedded human breast carcinoma tissue using anti-ATF1 antibody. Counter stained with hematoxylin.

ICC staining ATF1 in HUVEC cells (green). The nuclear counter stain is DAPI (blue). Cells were fixed in paraformaldehyde, permeabilised with 0.25% Triton X100/PBS.

ICC staining ATF1 in Hela cells (green). The nuclear counter stain is DAPI (blue). Cells were fixed in paraformaldehyde, permeabilised with 0.25% Triton X100/PBS.

Flow cytometric analysis of Hela cells with ATF1 antibody at 1/50 dilution (red) compared with an unlabelled control (cells without incubation with primary antibody; black). Alexa Fluor 488-conjugated goat anti rabbit IgG was used as the secondary antibody.

Background

Eukaryotic gene transcription is regulated by sequence-specific transcription factors that bind modular cis acting promoter and enhancer elements. The ATF/ CREB transcription factor family binds the palindromic cAMP response element (CRE) octanucleotide TGACGTCA. The ATF/CREB family includes CREB-1, CREB-2 (also designated ATF-4), ATF-1, ATF-2 and ATF-3. This family of proteins contain highly divergent N-terminal domains, but share a C-terminal leucine zipper for dimerization and DNA binding. ATF-1 is shown to play a key role in the induction of NOX1. ATF-1 binds the cAMP response element (CRE) and mediates PKA-induced stimulation of CRE-reporter genes. ATF-2 forms homodimers and heterodimers with c-Jun to initiate CRE-dependent transcription. Phosphorylation of ATF-2 at Thr 69 and Thr 71 by stress-activated kinases is necessary for transcriptional activation. Myc also induces phosphorylation of ATF-2 at Thr 69 and Thr 71 to prolong the half-life of ATF-2. ATF-2 functions as a histone

acetyltransferase (HAT) and acetylates Histones H2B and H4 specifically in vitro.
