

C5a anaphylatoxin Antibody HRP Conjugated

Catalog No: #C00221H

Package Size: #C00221H 100ul

Description

Product Name	C5a anaphylatoxin Antibody HRP Conjugated
Host Species	Rabbit
Clonality	Polyclonal
Isotype	IgG
Purification	Purified by Protein A.
Applications	WB IHC-P IHC-F
Species Reactivity	Hu Ms
Immunogen Description	KLH conjugated synthetic peptide aa 700-755 1680 derived from mouse C5a (725-770aa)
Conjugates	HRP
Target Name	C5a anaphylatoxin
Other Names	C5; He; C5a; Complement C5; Hemolytic complement; Hc
Accession No.	Swiss-Prot#P06684NCBI Gene ID15139
Cell Localization	Secreted
Concentration	1mg ml
Formulation	0.01M TBS(pH7.4) with 1% BSA, 0.03% Proclin300 and 50% Glycerol.
Storage	Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles.

Application Details

WB=1:500-2000 IHC-P=1:50-200 IHC-F=1:50-200

Background

Activation of C5 by a C5 convertase initiates the spontaneous assembly of the late complement components, C5-C9, into the membrane attack complex. C5b has a transient binding site for C6. The C5b-C6 complex is the foundation upon which the lytic complex is assembled. Derived from proteolytic degradation of complement C5, C5 anaphylatoxin is a mediator of local inflammatory process. Binding to the receptor C5AR1 induces a variety of responses including intracellular calcium release, contraction of smooth muscle, increased vascular permeability, and histamine release from mast cells and basophilic leukocytes. C5a is also a potent chemokine which stimulates the locomotion of polymorphonuclear leukocytes and directs their migration toward sites of inflammation.

Note: This product is for in vitro research use only and is not intended for use in humans or animals.
